# WHAT IS HUNTINGTON'S DISEASE?

**HUNTINGTON'S DISEASE (HD)** is a devastating, hereditary, degenerative brain disorder that results in a loss of cognitive, behavioral and physical control, and for which, presently, there is no treatment or cure. HD slowly diminishes the affected individual's ability to walk, think, talk and reason. Symptoms usually appear in an individual between 30 and 50 years of age and progress over a 10 to 25 year period. Eventually, a person with HD becomes totally dependent upon others for his or her care. More than 30,000 people in the United States are currently diagnosed with HD. Each of their siblings and children has a 50 percent risk of developing the disease, impacting another 200,00 people. Although medications can relieve some symptoms in certain individuals, research has yet to find a means of conquering or even slowing the deadly progression of HD.

**THE HUNTINGTON'S DISEASE SOCIETY OF AMERICA** is the largest 501(c)(3) non-profit volunteer organization dedicated to improving the lives of everyone affected by Huntington's disease. Founded in 1968 by Marjorie Guthrie, wife of folk legend Woody Guthrie who lost his battle with HD, the Society works tirelessly to provide the family services, education, advocacy and research to provide help for today, *hope* for tomorrow.
